Civic Tech Index (Figma Site Design) / (Heroku Development Site)

The Civic Tech Index(CTI)'s goal is to create a comprehensive, searchable index of all civic tech open source software projects regionally and globally. Using a simple methodology it takes 2 min (or less) per project to join the index.

The Civic Tech Index(CTI) is a complementary part of Project Index, a Code for America brigade network wide project.

Progress over last 6 months:

- MVP Feature roadmap complete
- Sitemap architecture design complete
- First high fidelity mockups complete and sent to development
- Development of site in progress, with focus on functional areas
- Github API integration to retrieve existing tags and initiate the replacement of tags in development
- Github API integration with database to record and catalog searches and deliver results
- Design filter logic
- Mobile design phase begun
- UX color schemes and style guide

Roadmap - Next 6 months

- Continue development on front end
- Finalize backend security and architecture
- Develop and test API for sharing data with CfA and other interested 3rd parties
- Stress test hosting environment
- Design initial marketing campaign
- Launch Alpha
- Conduct User Research
- Refine and launch Beta
- Refine (according to user research results) marketing campaign and launch
